DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to female condoms, classified in class 128, subclass 830.
- II. Claims 22-24, drawn to female condom, classified in class 128, subclass 830.
- III. Claims 25-30, drawn to female condom, classified in class 128, subclass 830.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 22 does not require the particulars of the subcombination to the extent set forth in claims 1, 9, and 16. The subcombination has separate utility such as the device requires means for retaining the pouch within the vagina.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 25 does not require the particulars of the subcombination to the extent set

Art Unit: 3743

forth in claims 1, 9, and 16. The subcombination has separate utility such as the device requires means for retaining the pouch within the vagina.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 22 does not require the particulars of the subcombination to the extent set forth in claim 25. The subcombination has separate utility such as the device requires a sponge retained at the closed end of the pouch.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II nor for Group III, restriction for examination purposes as indicated is proper.

Should applicant choose Group I to be examined, applicant hereby is required to further restrict as follows:

IV. Claims 1-8, drawn to female condoms, classified in class 128, subclass 830.

V. Claims 9-21, drawn to female condoms, classified in class 128, subclass 830.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 3743

claimed because claim 1 does not require the particulars of the subcombination to the extent set forth in claims 9 and 16. The subcombination has separate utility such as the device requires a frame for attaching to the open end of the pouch.

Because these inventions are distinct for the reasons given above and the search required for Group IV is not required for Group V, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Shrinath Malur on September 29, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
